

Beta test documentation

Beta Tester Instructions for TCGM

Hi,

Thank you for agreeing to beta test TCGM — we're excited to have your feedback as we improve the app before launch.

What is TCGM ?

TCGM is web based TCG creator and editor, where users can create their own TCG game and play community made ones with their friends and other TCG players round the world.

Goals of This Beta Test

- Identify bugs or glitches
 - Test core features and flows
 - Evaluate usability and user experience
 - Collect feedback on design and functionality
-

How to Get Started

1. **Connect to the app.**

Link to the website :

2. **Create an Account / Sign In**

Sign up and create an account through the login portal.

3. **Use the App Normally**

When testing the TCG creation aspect core areas:

- [Feature 1] – Create a game using the create game button in the game's list page.

- [Feature 2] – Access the editor for the game by clicking on the edit game button.
- [Feature 3] – Create a new card type for the game.
- [Feature 4] – Create a new card that uses the previously created card type.
- [Feature 5] – From the editor page access the board editor and create a game board for your game.

When testing the TCG gameplay aspect :

- [Feature 1] – Click the play button for a game in the game's list page.
- [Feature 2] – Go to the edit deck tab and edit your deck for the game.
- [Feature 3] – Create a room for the game and copy the room id.
- [Feature 4] – Open a new web page with the website and click play on the same game.
- [Feature 5] – On the second web page click join room and enter the room id.
- [Feature 6] – Once in game, use both pages and drag and dropping cards to different zones.
- [Feature 7] – Left click the deck to draw a card from your deck.
- [Feature 8] – Right click the different zones to view the context menus.
- [Feature 9] – Right click a card to move it from one zone to another.
- [Feature 10] – Right click a card to add or remove counters from it.
- [Feature 11] – Click the chat logo to view it and send a message.

4. **Test on Different Browsers** (if possible)

5. **Tester will test the above features an no other features of the app.**

Reporting Bugs & Issues

If you encounter anything unexpected, please report it using the following format:

- **Device/OS and browser version:** (e.g., Windows 11 firefox)

- **Steps to Reproduce:** (What you did before the issue occurred)
- **Expected vs. Actual Behavior:**
- **Screenshot/Screen Recording** (if possible)

Feedback submission :

For each tester feature, the tester must give the following feedback :

- Was I able to use the feature ? If not then Why ?
- Did I struggle to use the feature when testing it ? If so then how ?
- Was the feature pleasing to look at ?
- Was the feature visually clear ?
- Did I encounter any bugs while testing the feature ? If so then which ones ?

Testers can submit their feedback in a text document, PDF or shared file as they wish in the appropriate discord channel or by email.

Feedback Suggestions

We'd love to hear your thoughts on:

- What you liked or found helpful
 - What was confusing or frustrating
 - Any features you'd like to see added
 - General impressions
-

Test Period

The beta test will run from 08/07/25 to 11/07/25. Please try to use the app at least 1 times during this period.

Confidentiality

Please don't share screenshots, videos, or details about the app publicly. This is a private beta.
